

Technology Leads Innovation and Upgrades in Healthcare Environment

Chengdu Xinan Hospital, Sichuan China

Sichuan Chengdu Xinan Hospital, selected DuPont™ Tedlar® wallcovering as an innovative material for its corridors, wards and labor rooms, totaling about 30,000sqm.

“Tedlar® wallcovering provides not only unique values such as easy-cleaning and long-term protection, its paneling system can also ensure an efficient quality installation without having onsite concerns, fully in line with the requirements of the hospital.” Mr. Jiang Xiaoxuan - Director of Business Development of Chengdu Jinxin Medical Investment Management Group Co., Ltd.

▲ Corridor

DUPONT
Tedlar®

DuPont™ Tedlar® PVF provides the reliable quality and superiority interior surfaces that enable the overall healthcare environment to be aesthetical and durable.

▼ Consulting room

▼ Ward

▼ Office area

▼ VIP rehabilitation wards

Wood and natural looks are favorable patterns to create VIP restrooms, offices and open areas. Satisfying both patient and hospital staff for a pleasant, comfortable atmosphere, while combining the functionality of strong cleanability and chemical resistance.

▲ Labor workshop

▲ B ultrasonic room

Having characteristics of mold and mildew resistant, Tedlar® wallcovering doesn't support bacteria growth, which enables its usage in labor rooms and critical areas such as emergency points and diagnostic rooms.
